FESTIVAL FOR CONTEMPORARY DANCE AND PERFORMANCE

10.06. - 12.06.2016 Kunstkraftwerk Leipzig

P-Bodies are discrete, but prominent foci. P-Bodies process the essential. What is essential, all decide for themselves and everybody together.

The first edition of the Festival is about unstable states. Gender Identity, cyborgs, crossing borders. Within the fluctuating range of dance and performing arts in Leipzig, the festival should become a constant which is geared to german and international developments in contemporary dance and performing arts.

Known artists and collectives meet promising newcomers and actors of the local scene. P-Bodies presents formats and aesthetics that cannot be found in this constellation and concentration in Leipzig so far.

The boundaries between contemporary dance, performing arts, music and visual arts are set harsh, blurred and questioned.

23 performances, 3 concerts, 5 workshops, 1 panel discussion

Around the industrial area Saalfelder Straße 8, the festival will absorb the tension and dynamics of its space from 10th to 12th of June 2016.

P-Bodies is an ambitious project that wants to become a multifaceted alternative in a constant and courageous way.
